EDUCATION

Northeastern University

Boston, MA

B.S. in Computer Science; GPA: 3.97/4.0; Dean's List

Sep. 2025 – Dec 2028

- Coursework: Linear Algebra, Foundations of Data Science, Object-Oriented Design, Intro to Cybersecurity

EXPERIENCE

Software Developer – Oasis Club @ NEU | *React, Zustand, Supabase, PostgreSQL* Feb 2026 – Present *Northeastern University* *Boston, MA*

- Built a fully deployed Goodreads-style book tracking app with Open Library API integration, search, trending books, and recently viewed recommendations
- Implemented Supabase authentication and user profiles with reading stats, shelves (read/reading), and a page progress tracker

Founder & Developer - RefClock (Mobile App) | *HTML, CSS, JavaScript* Mar 2026 – Present *Self-initiated* *Boston, MA*

- Built a progressive web app with HTML/CSS/JavaScript, published for production on Android/Google Play Store
- Soccer referee timer/scorekeeper that logs live game data (goals, cards, player numbers)
- Self-promoted the app to adoption by Northeastern Intramural Soccer officials

Soccer Referee Oct 2021 – Present *Fremont Youth Soccer Club → Northeastern Intramural Official* *Fremont, CA & Boston, MA*

- 5 years certified with the California North State Referee Committee
- 150+ hours referring youth & adult soccer games as Assistant and Center Referee

Los Altos Hacks Sponsorship Team March 2024 – April 2025 *Los Altos High School* *Los Altos, CA*

- Part of a team that raised \$32k in sponsorship from Google, Palantir, Vercel, HRT, Juniper, + more
- Organizer for the world's largest high school hackathon (420 attendees)

PROJECTS

Plant – NUACM Hackathon Education Track Winner | *Next.js, React, TypeScript, Python* Oct 2025

- Built a Next.js app with a team of 3 that helps students plan academic schedules with AI-powered course recommendations, requirement tracking, and drag-and-drop semester planning
- Web-scraped 1000+ courses and 100+ majors; integrated Firebase Auth and Google Gemini for personalized suggestions

Machine Learning Essentials Bootcamp – AI Club, NEU | *Python, NumPy, Pandas* Sep 2025 – Dec 2025

- Implemented linear regression, PCA, and K-means clustering from scratch on real-world datasets (Spotify, UCI Wine)
- Built a multi-layer perceptron neural network from scratch with backpropagation, dropout, and mini-batch gradient descent; achieved 86.5% test accuracy

Dragon Boat Seating App | *Java, Spring Boot, PostgreSQL, HTML/CSS/JS* Jan 2026 – Present

- Built a Spring Boot MVC app for managing paddler rosters with an interactive drag-and-drop boat layout visualization
- Integrated with a local SF dragon boat team's website; supports CSV import/export for paddler data

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C/C++, HTML/CSS, SQL

Developer Tools: Git, VS Code, Eclipse, Gradle, PostgreSQL, Linux/Ubuntu, Claude Code

Libraries: Spring Boot, React, JUnit, Jackson, NumPy, Pandas, Matplotlib, BeautifulSoup, Leaflet
